

Barracuda

The BARRACUDA slip-on system for the SUZUKI BANDIT achieves the highest production quality. Every detail has received the same amount of attention. Technologically advanced production and top-quality hand welding are reflected in a superior and unique final product, the result of the experience we have gained in developing exhaust systems. This product was also created in our development department by the same team which develops exhaust systems for the race teams.

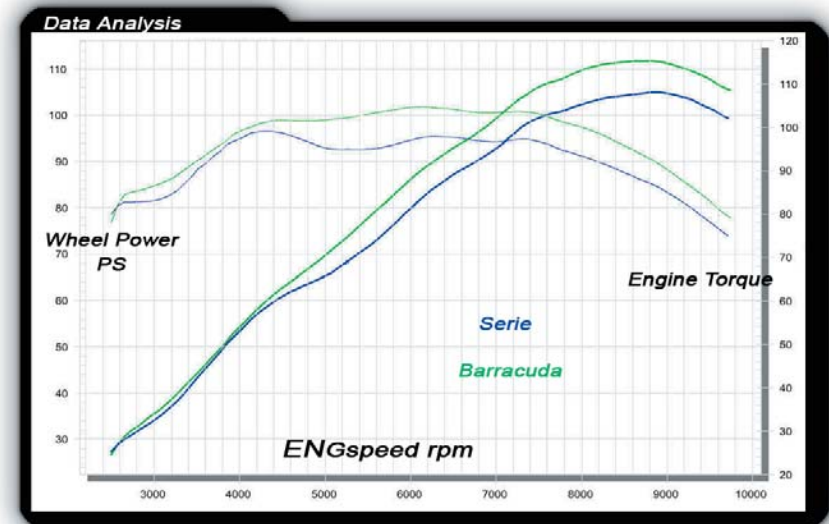

The BARRACUDA slip-on system is unique. The link pipe is made of stainless steel, while the oval-section muffler is available in either carbon-fiber or aluminium (the choice of muffler does not affect the overall performance). The total weight of the slip-on system is 3.5 kg lighter than stock. The entire rear end of the slip-on system (muffler, clamp and tension springs) is made using the same materials and technology which we provide to the racers.

Installation of the slip-on system is simple and fast, as it is designed as a supplement to the original exhaust system. No special tools are needed. The central stand can not be used after installation of the slip-on system.

For a reasonable price, the BARRACUDA slip-on system offers increased power and torque, lighter weight and better looks. The BARRACUDA logo with the BARRACUDA on the muffler is a guarantee that you have chosen the finest product on the market.

Bolton also available for Bnadits before 2002.

Technical Data	stock	Barracuda	Difference
Weight Measurements	5.7 kg	2.2 kg	3.5 kg
Power Measurements	105 HP / 9000 rpm	112 HP / 9000 rpm	7 HP / 9000 rpm*
Noise Measurements		97db / 4250 rpm
